

ORDER FORM

There are very few Maths textbooks that can be used across different ages and abilities, this is one of those books. Not only can this resource be used to differentiate materials within any class, it can also be used for learners across every level of secondary school. In this book, each algebraic skill develops slowly, with large numbers of questions to facilitate mastery. In addition, each skill develops from the basic to complex, allowing more able learners to be stretched beyond their level, providing depth.

Order by 26th of September for only £200 per class set. Order 5 or more sets and we will include a free copy of the new Higher Homework.
